**The National Brain Health Center  
for African Americans**

Objectives:

- Raise awareness of the issues affecting cognitive health among African Americans via the capacity development of African Americans congregations to become an integral partner in reducing risk, disease & care management, caregiving and importance of clinical studies
- Provide trainings and information to healthcare & public health professionals regarding specific issues affecting cognitive health among African Americans
- Develop culturally tailored, faith-based tools and resources to be utilized by the health ministries to raise awareness about brain health and caregiver needs among African Americans within their congregations and communities

[www.balmingilead.org/memorysunday](http://www.balmingilead.org/memorysunday) 

---

---

---

---

---

---

---

---

---

---

**Why do we need a Memory Sunday?**

*Cognitive health issues like dementia and Alzheimer's disease create a heavy burden on African Americans, their families, caregivers and the community*

[www.balmingilead.org/memorysunday](http://www.balmingilead.org/memorysunday) 

---

---

---

---

---

---

---

---

---

---

**Cognitive health** encompasses emotional functioning and is the ability to:

**THINK  
REASON  
REMEMBER**

[www.balmingilead.org/memorysunday](http://www.balmingilead.org/memorysunday) 

---

---

---

---

---

---

---

---

---

---

### Characteristics of Normal Aging

- Intelligence remains intact
- Normal performance on mental status examination
- Occasional complaints of memory loss
- Memory loss can be experienced by healthy people at any age
- Some memory loss may be more noticeable with age

[www.balmingilead.org/memorysunday](http://www.balmingilead.org/memorysunday) 

---

---

---

---

---

---

---

---

### Normal Aging vs. Dementia

➤ Dementia is **NOT a NORMAL** part of aging!!!

➤ Dementia is characterized by a progressive ***decline*** in not only memory but the following cognitive functions ***that interfere with activities of daily life:***

- Language
- Problem-solving
- Judgement
- Occurs due to damaged or destroyed nerve cells involved in cognitive function caused by disease, illness, or injury

[www.balmingilead.org/memorysunday](http://www.balmingilead.org/memorysunday) 

---

---

---

---

---

---

---

---

### Normal vs. Abnormal Cognitive Decline:

Normal memory loss as we age	Possible signs of dementia
Occasionally making the wrong decision	Frequently showing poor judgement and decision making
Forgetting to pay a bill	Not being able to manage money and household finances
Not remembering what day it is but remembering later	Not knowing the date, year, or season

[www.balmingilead.org/memorysunday](http://www.balmingilead.org/memorysunday) 

---

---

---

---

---

---

---

---

### Causes of Cognitive Impairment

- **Acquired Causes** (*can be related to illness, disease state, and/or other biomedical factors*)
  - Traumatic Brain Injury, Drugs & Alcohol, Chronic Stress
- **Degenerative Causes** (*these causes are related to diseases that have no cure and will continue to progress*)
  - Alzheimer's, Parkinson's, Multiple Sclerosis
- Cognitive impairment related to acquired causes may be corrected once the underlying cause is properly treated and/or managed

[www.balmingilead.org/memorysunday](http://www.balmingilead.org/memorysunday) 

---

---

---

---

---

---

---

---

### What is Alzheimer's Disease?

*Memory Sunday, June 9, 2019 is focused on Alzheimer's Disease and its impacts within the African American Community*

[www.balmingilead.org/memorysunday](http://www.balmingilead.org/memorysunday) 

---

---

---

---

---

---

---

---

### Alzheimer's Disease & African Americans

- Alzheimer's disease is the sixth leading cause of death in the United States, but the **5<sup>th</sup> leading cause of death for older African Americans**
- African Americans are generally diagnosed at later stages of Alzheimer's disease limiting the effectiveness of treatments
- The risk of developing Alzheimer's is **2-3 times higher** for African Americans

[www.balmingilead.org/memorysunday](http://www.balmingilead.org/memorysunday) 

---

---

---

---

---

---

---

---

### Alzheimer's Disease & African Americans

- African Americans have higher rates of chronic disease like diabetes and heart disease that significantly increases risk of developing Alzheimer's
- Persons with a history of either high blood pressure or high cholesterol are **twice as likely** to get Alzheimer's
- Those with both risk factors are **4 times as likely** to become demented

[www.balmingilead.org/memorysunday](http://www.balmingilead.org/memorysunday) 

---

---

---

---

---

---

---

---

### Alzheimer's Disease

- Most common form of dementia & accounts for 60 – 80% of all cases
- Progressive, degenerative and irreversible
- Alzheimer's disease-related brain changes may occur 15-20 years prior to symptom onset
- African Americans are generally diagnosed at later stages of Alzheimer's disease limiting the effectiveness of treatments

[www.balmingilead.org/memorysunday](http://www.balmingilead.org/memorysunday) 

---

---

---

---

---

---

---

---

### Signs of Alzheimer's Disease

- Memory loss that disrupts daily life
- Challenges in planning or solving problems
- Difficulty completing familiar tasks
- Confusion with time or place

[www.balmingilead.org/memorysunday](http://www.balmingilead.org/memorysunday) 

---

---

---

---

---

---

---

---

**Signs of Alzheimer’s Disease**

- Trouble understanding visual images or spatial relationships
- Misplacing things and losing the ability to retrace steps
- Withdrawal from work or social activities

www.balmingilead.org/memorysunday 

---

---

---

---

---

---

---

---

**Challenges of African Americans & Alzheimer’s Care**

- There is **no cure** for Alzheimer’s
- Available medications & non-drug options work to slow the progression and treat other symptoms of the disease
- Many factors can impact African Americans in getting diagnosed earlier, accessing & utilizing available care & services, and overall quality of life once diagnosed

www.balmingilead.org/memorysunday 

---

---

---

---

---

---

---

---

**Why Should the Faith Community Get Involved?**

*The African American church is the oldest and most influential institution within African American culture*

www.balmingilead.org/memorysunday 

---

---

---

---

---

---

---

---

### Memory Sunday: a Mobilization Campaign

- **Memory Sunday** promotes national mobilization and education of faith communities to take a greater role in increasing the awareness and understanding of Alzheimer's and supporting persons living with Alzheimer's and their caregivers
- The goal of **Memory Sunday** is to utilize the influence and impact of every African American pulpit to engage in activities that contribute to reducing the risk of Alzheimer's, care options, and provide compassionate support to those who are living with Alzheimer's and their caregivers

## Slide 22

---

**ML(1)** CDC and the scientific community do not support memory screens in a non-health care environment.  
Please remove this from all materials for all memory sundays

McGuire, Lisa (CDC/DDNID/NCCDPHP/DPH), 2/21/2019

**PP7** This is the same language that was changed in the Book of Alz and the Memory Sunday Toolkit, it was missed in the slide deck; however, all discussions related to memory sunday screenings are related to encouraging participants to reach out to their healthcare provider to get screened.

Pamela Price, 2/21/2019
