the conversation about

UTERINE FIBROIDS

Sharing your symptoms with a trusted healthcare provider can be the start of the healing journey.

WHAT ARE UTERINE FIBROIDS?

Uterine fibroids are noncancerous tumors that develop in or on the muscular walls of the uterus and are among the most common reproductive tract tumors in women.¹

WHAT ARE THE SYMPTOMS OF UTERINE FIBROIDS?

Common symptoms include heavy and prolonged menstrual bleeding, anemia, pelvic pain, urinary frequency or retention, and pregnancy loss, and, in some cases, infertility.

WHERE CAN I LEARN MORE?

A few suggested resources can be found below.
