

Activities for Churches

Prayer and HIV prevention education are two powerful ways to address HIV/AIDS. Below are a few suggestions for ways your church can provide support:

- Welcome everyone, regardless of their HIV status or sexual orientation.
- Deliver a sermon about HIV/AIDS related issues.
- Host a church conference or workshop on HIV/AIDS.
- Host a prayer vigil for the healing of AIDS.
- Discuss HIV/AIDS related topics during Bible Study and Sunday school.
- Create an AIDS ministry for ongoing prevention education and to provide support for church and community members impacted by the disease.
- Host HIV prevention education programs for teenagers.
- Encourage church members to volunteer at local HIV/AIDS service centers.
